

**CRISP, HIGH-QUALITY SCANS FOR
ENHANCED PIPE & STEEL WORK**

NEW LASER SCANNING CAPABILITIES

NO-CONTACT PROCESS

Laser scanning safely measures equipment in operation and eliminates lift/scaffolding needs.

CREATING A DIGITAL TWIN

Laser scanning your facility can limit return trips, record existing conditions and allow for remote walkthroughs.

IMPROVED SPEED & ACCURACY

Scans taken in 3D, with point accuracy of 3/16" at 130 feet, replace the need for error-prone manual measurements.

THE
KELLY
GROUP

SCANNING IS JUST THE START

We offer a turnkey approach to all our projects – with a structural steel processing line, CNC orbital pipe cutting, multiple fabrication facilities, a drafting team and hundreds of skilled craftsmen.
